SUMMARY

Software Engineer specializing in full-stack engineering and AI-driven development. Experienced in building scalable backend services, intelligent applications, and modern web interfaces for early-stage startups and global enterprises. Known for strong technical ownership, adaptability, and collaborative leadership.

TECHNICAL SKILLS

Languages & Frontend: Python, Java, C#, C/C++, JavaScript, TypeScript, SQL, React/React Native

Backend, Cloud & Tools: Azure, .NET, Node.js, REST APIs, Google Cloud, CI/CD, Git, MongoDB, Jenkins

EXPERIENCE

Minicor (Contract)

Apr. 2026 – Present

Forward Deployed Engineer

San Francisco, CA (Remote)

- Owned go-live delivery for an AI healthcare client, using Google Cloud Platform to support automations that process clinic fax reports and retrieve operational data
- Built Python scripts for AI agent-driven RPA workflows with self-healing recovery, exposing legacy medical system tasks through API-callable endpoints
- Tested, debugged, and optimized RPA workflows across Windows VM environments, reducing workflow execution time by 15% for a high-priority client
- Built JavaScript features for workspace administration, user invites, and access management

AiAware

Jan. 2025 – Mar. 2026

Software Engineer

Ottawa, ON

- Owned and led end-to-end engineering for 2 flagship AI-powered risk assessment tools serving public sector bodies
- Drove engineering efforts advancing a \$500K+ government contract to pilot phase
- Built an AI chatbot with a React UI and Python backend using LLMs trained on audit documents
- Implemented a RAG pipeline using Azure OpenAI and AI Search to embed, index, and query unstructured data
- Developed an LLM-powered application for large-scale document analysis, improving the speed, accuracy, and consistency of complex audit reviews

Motorola Solutions (Co-op)

May 2023 – Aug. 2023

Software Engineer, VESTA 911 Call Handling

Gatineau, QC

- Designed and built tools to detect Azure connectivity issues, supporting engineers with automated diagnostics, reducing downtime by 75% during product deployment
- Enhanced Python automation scripts across a testing floor of 10+ integrated data and communication labs
- Documented and demonstrated to teams how to use, market, and further develop new tools

Warner Bros. Discovery (Co-op)

May 2022 – Jul. 2022

Software Developer, HBO Max

Kanata, ON

- Developed and refactored accessibility and player control features for the HBO Max app using the You.i One Engine with React Native, improving performance and stability
- Tested, implemented, and refined features within HBO Max applications in both macOS and tvOS
- Improved React Native core functionality and refined packages, boosting performance and user experience

Magnet Forensics (Co-op)

Jan. 2021 – Apr. 2021, Sept. 2021 – Dec. 2021

Software Developer, Cloud Acquisition Team

Ottawa, ON

- Diagnosed and solved various Google Takeout issues, adding new data types and unblocking a critical customer
- Built cloud features in C#/ .NET across 2 terms, enhancing Magnet Axiom's digital information tool suite
- Reverse engineered private APIs (Slack, Instagram, Snapchat, MEGA) to create new XML/JSON forensic artifacts
- Worked with CI/CD automation and build pipelines within Jenkins to support continuous integration and testing

University of Ottawa (Co-op), Department of Family Medicine

May 2020 – Dec. 2020

Software Engineer Intern, DFM Innovation Team

Ottawa, ON

- Designed & produced an e-learning portal using React, Redux and Firebase, serving thousands of students

EDUCATION

University of Ottawa

Sept. 2019 – Dec. 2023

Bachelor of Applied Sciences in Software Engineering - CGPA: 3.9/4.0 - *Magna Cum Laude*
